

Year-to-date and Monthly Sales Revenue and Sales Volumes for the period ending April 30, 2010

May 17, 2010 - International Barrier Technology Inc. ("Barrier") (IBTGF: OTCBB; IBH: TSXV), a manufacturer of proprietary fire-resistant building materials has released year-to-date fiscal (July 09 through April 10) and monthly revenue and sales volumes results for the period ending April 30, 2010. Overall revenue generated year-to-date is \$2,342,719 vs. \$3,669,875 during the same period in 2009. Revenue into the Residential Roof Deck/Wall Assembly Market was \$446,083 vs. \$552,584 in 2009. Revenue attributable to the Commercial Modular industry was \$905,966 (in comparison to \$1,336,183 year-to-date through April 30, 2009) and revenue from the Structural Insulated Panel market was \$6,502 vs. \$17,606. Revenue for the month of April 2010 was \$220,766, which was a 13% increase over the \$195,501 generated in April 2009.

On January 19, 2010 Barrier entered into an exclusive Supply Agreement with LP Building Products (LP), the largest producer of Oriented Strand Board (OSB) in the world. The agreement gives LP the exclusive right to sell Pyrotite treated panel products in North America under their brand name LP FlameBlock™. While this agreement is expected to dramatically improve sales volume and financial performance for Barrier, sales revenue reported will be influenced in a negative direction since LP will be providing their own OSB, with no pass through charges for Barrier on the substrate or inbound and outbound freight. Barrier's margin will be on the treatment of the OSB only.

Sales volume of shipments of Barrier products for the year-to-date period July 2009 through April 2010 was 4,240,500 sq. ft. This is in comparison to 5,100,200 sq. ft. that was shipped during the same period last year. Residential Roof Deck/Wall Assembly sales increased 13% to 1,393,400 sq. ft. (1,228,700 sq. ft. year-to-date through April, 2009). Commercial Modular shipments decreased year over year to 2,834,200 sq. ft. vs. 3,779,000 sq. ft. Shipments into the Structural Insulated Panel market for the nine months were 12,900 sq. ft. in comparison to 44,800 sq. ft.

Shipment volumes for the month ending April 30, 2010 were up 121% from 331,300 sq. ft. in April 2009 to 733,700 sq. ft. All shipments during April were related to the LP business model and were associated with the Residential Roof Deck/Wall Assembly Market. The Commercial Modular Market, where excess inventory was developed over the winter months to take advantage of seasonably low prices for OSB and to help regulate Barrier's production schedule and cash flow, continued to service product requirements out of that inventory. The Commercial Modular market, serviced by MuleHide Products, Inc. since 2004, is the only North American market not granted to LP. Barrier continues to service the commercial modular market through sales to MuleHide directly.

About International Barrier Technology Inc.

International Barrier Technology Inc. (OTCBB: IBTGF; TSXV: IBH) develops, manufactures, and markets proprietary fire-resistant building materials branded as Blazeguard®. Barrier's award-winning Blazeguard® wood panels use a patented, non-toxic, non-combustible coating with an extraordinary capability: it releases water in the heat of fire. The panels exceed "model" building code requirements in every targeted fire test and application, and are unique in combining properties that increase panel strength and minimize environmental and human impact. Blazeguard® provides Barrier's customers a premium material choice meeting an increasingly challenging combination of requirements in residential and commercial building construction.

Blazeguard® customers include many of the top multifamily homebuilders, and commercial modular building manufacturers in the United States.
