

International Barrier Technology – Fire-Resistant Building Materials Company Reports Fiscal Year Revenue of \$4,091,884 and Shipment Sales Volume of 5,780,000 sq. ft. for Year-Ended June 30, 2009

July 14, 2009 - International Barrier Technology Inc. ("Barrier") (IBTGF: OTCBB; IBH: TSXV), a manufacturer of proprietary fire-resistant building materials has released sales volumes for both the fourth quarter and the fiscal year ending June 30, 2009.

Shipments for the quarter ending June 30, 2009 were 1,011,200 sq. ft. Of this total, 687,600 sq. ft. shipped into the Commercial Modular market and 323,600 sq. ft. into the Multi-Family Residential Roof Deck market. This is in comparison to overall shipments of 1,890,800 sq. ft. in Q4 (Apr-Jun 08). Revenues reported for the quarter were \$617,510 (\$233,789 from Commercial Modular and \$134,950 from Multi-family Residential Roof Deck).

Blazeguard shipment sales volumes of 5,780,000 sq. ft. were achieved for the fiscal year ending June 30, 2009 (July 2008 – June 2009). This includes 4,182,900 sq. ft. into the Commercial Modular sector, 1,552,300 sq. ft. into the Multi-Family Residential Roof Deck, and 44,800 sq. ft. into Structural Insulated Panels. This is in comparison to 7,222,500 sq. ft. in the prior fiscal year.

Fiscal year-to-date sales revenue was \$4,091,884 vs. \$4,877,793 reported last year. The revenue generated from Commercial Modular was \$1,473,532; \$668,067 is attributable to Multi-Family Residential Roof Deck; and \$17,606 was generated from Structural Insulated Panels.

Overall sales for the year were impacted by the on-going economic recession and the steep decline in construction throughout the U.S. and Canada this past year. Barrier, though, sees many opportunities for growth in Fiscal Year 2010. These include a slow but steady recovery in the construction industry in both the Commercial Modular and Multi-Family Residential Roof Deck markets; growth in the use of Structural Insulated Panels to increase energy-efficiency and offer a more cost effective construction solution; further development of the Wildland Urban Interface regions of California and Oregon; upcoming military projects requiring fire-resistant building materials; and R&D endeavors looking to further diversify product offerings to potentially include fire-resistant foam core options.

About International Barrier Technology Inc.

International Barrier Technology Inc. (OTCBB: IBTGF; TSXV: IBH) develops, manufactures, and markets proprietary fire-resistant building materials branded as Blazeguard®. Barrier's award-winning Blazeguard® wood panels use a patented, non-toxic, non-combustible coating with an extraordinary capability: it releases water in the heat of fire. The panels exceed "model" building code requirements in every targeted fire test and application, and are unique in combining properties that increase panel strength and minimize environmental and human impact. Blazeguard® provides Barrier's customers a premium material choice meeting an increasingly challenging combination of requirements in residential and commercial building construction. Blazeguard® customers include many of the top multifamily homebuilders, and commercial modular building manufacturers in the United States.
