

Year-to-date and Monthly Sales Revenue and Sales Volumes for the period ending May 31, 2010

June 17, 2010 - International Barrier Technology Inc. ("Barrier") (IBTGF: OTCBB; IBH: TSXV), a manufacturer of proprietary fire-resistant building materials has released year-to-date fiscal (July 09 through May 10) and monthly revenue and sales volumes results for the period ending May 31, 2010. Overall revenue generated year-to-date is \$2,464,023 vs. \$3,931,419 during the same period in 2009. Revenue into the Residential Roof Deck/Wall Assembly Market was \$521,746 vs. \$629,012 in 2009. Revenue attributable to the Commercial Modular industry was \$913,255 (in comparison to \$1,413,344 year-to-date through May 31, 2009) and revenue from the Structural Insulated Panel market was \$7,101 vs. \$17,606. Revenue for the month of May 2010 was \$121,303 vs. \$261,544 generated in May 2009.

On January 19, 2010 Barrier entered into an exclusive Supply Agreement with LP Building Products (LP), the largest producer of Oriented Strand Board (OSB) in the world. The agreement gives LP the exclusive right to sell Pyrotite treated panel products in North America under their brand name LP FlameBlock™. While this agreement is expected to dramatically improve sales volume and financial performance for Barrier, sales revenue reported will be influenced in a negative direction since LP will be providing their own OSB, with no pass through charges for Barrier on the substrate or inbound and outbound freight. Barrier's margin will be on the treatment of the OSB only.

Sales volume of shipments of Barrier products for the year-to-date period July 2009 through May 2010 was 4,536,500 sq. ft. This is in comparison to 5,511,100 sq. ft. that was shipped during the same period last year. Residential Roof Deck/Wall Assembly sales increased 14% to 1,665,500 sq. ft. (1,460,400 sq. ft. year-to-date through May 2009). Commercial Modular shipments decreased 29% year over year to 2,856,900 sq. ft. vs. 4,005,900 sq. ft. Shipments into the Structural Insulated Panel market for the eleven months were 14,100 sq. ft. in comparison to 44,800 sq. ft.

Shipment volumes for the month ending May 31, 2010 were 296,112 sq. ft. vs. 410,944 sq. ft. in May 2009. The majority of shipments during (May 77%) were related to the LP business model and were associated with the Residential Roof Deck/Wall Assembly Market. The excess commercial modular inventory that was developed over the winter months is starting to be reduced significantly. As that inventory is depleted, Barrier anticipates sales into that market to return to more normal levels. The Commercial Modular market, serviced by MuleHide Products, Inc. since 2004, is the only North American market not granted to LP. Barrier continues to service the commercial modular market through sales to MuleHide directly.

About International Barrier Technology Inc.

International Barrier Technology Inc. (OTCBB: IBTGF; TSXV: IBH) develops, manufactures, and markets proprietary fire-resistant building materials branded as Blazeguard®. Barrier's award-winning Blazeguard® wood panels use a patented, non-toxic, non-combustible coating with an extraordinary capability: it releases water in the heat of fire. The panels exceed "model" building code requirements in every targeted fire test and application, and are unique in combining properties that increase panel strength and minimize environmental and human impact. Blazeguard® provides Barrier's customers a premium material choice meeting an increasingly challenging combination of requirements in residential and commercial building construction. Blazeguard® customers include many of the top multifamily homebuilders, and commercial modular building manufacturers in the United States.
