

Monthly Sales Revenue and Sales Volumes for the period ending May 31, 2017

June 16, 2017 - International Barrier Technology Inc. ("Barrier") (IBTGF: OTCQB; IBH: TSX-V), a manufacturer of proprietary fire-resistant building materials has released monthly and year-to-date revenue and sales volumes results for the period ending May 31, 2017 for the Watkins, MN manufacturing location. Total sales revenue generated for the fiscal year-to-date period (Jul-May) was \$8,785,760, a 2% increase from the \$8,635,368 generated during the same period ending in 2016. During the year-to-date reporting period, sales revenue into the Residential Roof Deck/Wall Assembly market increased 27% and sales revenue into the Commercial Modular market decreased 43%.

Sales revenue for the Commercial Modular segment of Barrier's business has been compromised over the last several months by a strong increase in OSB pricing relative to plywood. When that occurs, prices of Barrier treated OSB is less competitive in comparison to plywood treated products. Barrier anticipates that sales volume into the commercial modular segment will continue to be lower, relative to last year, until OSB prices relative to plywood return to levels more consistent with historical levels

Overall sales revenue generated for the month of May 2017 was \$471,841 vs. \$820,330 in May 2016. License revenue generated through royalty payments paid by LP for shipments out of their FlameBlock production facility in Alabama are not included in this announcement, it will be included in Barrier's quarterly financial statements to be published soon. Clarke County shipments have increased significantly over the past few months and orders being shifted to that facility have reduced the number of orders being shipped from Barrier's facility in Watkins. Overall, the volume of FlameBlock shipments, when including both facilities, continues to outpace last years volume; year to date as well as month to month. Market share for the use of the FlameBlock product continues to strengthen based on LP's sustained commitment to marketing and sales efforts.

Year-to-date square footage of shipments of Blazeguard and FlameBlock from the Watkins, MN location was 24,660,840 sq. ft., an increase of 11% over the 22,314,560 sq. ft. shipped Jul-May 2016. Of the total volume of shipments from Watkins, sales into the Residential Roof Deck/Wall Assembly market grew 26% year-over-year, while shipments into the Commercial Modular market has decreased 44%. Total square footage of shipments to all markets for the month of May 2017, was 1,274,592 sq. ft. in comparison to 2,084,312 sq. ft. in May 2016. When including shipment from both facilities, overall shipment volume of Flameblock products in the month of May increased by 28%, year to year.

About International Barrier Technology Inc.

International Barrier Technology Inc. (OTCQB: IBTGF; TSX-V: IBH.V) develops, manufactures, and markets proprietary fire-resistant building materials branded as LP® FlameBlock® Fire-Rated OSB Sheathing and FR Deck Panel. Barrier's award-winning fire-resistant wood panels use a patented, non-toxic, non-combustible coating with an extraordinary capability: it releases water in the heat of fire. The panels exceed "model" building code requirements in every targeted fire test and application, and are unique in combining properties that increase panel strength and minimize environmental and human impact. Barrier's family of products provides customers a premium material choice meeting an increasingly challenging combination of requirements in residential and commercial building construction.
