

October 2008 Monthly Sales Revenue and Sales Volumes

November 14, 2008 - International Barrier Technology Inc. ("Barrier") (IBTGF: OTCBB; IBH: TSXV), a manufacturer of proprietary fire-resistant building materials is pleased to release revenue and sales volumes results for the month ending October 31, 2008. Overall revenue generated for the month was 12% higher at \$452,280 than the \$403,556 generated during the same period in 2007. Revenue attributable to the Multi-Family Residential Roof Deck market grew substantially to \$67,274 (vs. \$16,035 in October 07). Revenue into the Commercial Modular Market declined to \$165,176 vs. \$192,975 in 2007.

Sales volume of shipments of Blazeguard product for the month ending October 31, 2008 was 608,300 sq ft. This was consistent with the 611,000 sq ft that was shipped during the same period one year ago. Multi-Family Residential Roof Deck shipments grew significantly to 157,500 sq ft vs. 19,800 sq ft shipped during the same month last year. This included 91,100 sq ft into Southern California and 66,400 sq ft into the Mid-Atlantic. Shipments into the Commercial Modular market were 450,800 sq ft vs. 577,800 sq ft. (There were no shipments into the Structural Insulated Panel market this month in comparison to 19,800 sq. ft. in October 2007.)

The continued growth in the Residential Roof Deck Market over the past few months has been a positive sign for Barrier during this prolonged decline/weakness in the construction industry. In addition, we are confident in our ability to penetrate the market throughout California in roof deck, wall, and under eave applications. Despite, the growth and opportunity, we remain cautious and focus on key efficiencies in the manufacturing process to keep costs at a minimum. Commercial Modular shipments were lower in October, but we are convinced that shipment levels will remain steady rate as current modular manufacturers continue to use our products and with additional projects in Canada and Alaska being specified to use our material.

About International Barrier Technology Inc.

International Barrier Technology Inc. (OTCBB: IBTGF; TSXV: IBH) develops, manufactures, and markets proprietary fire-resistant building materials branded as Blazeguard®. Barrier's award-winning Blazeguard® wood panels use a patented, non-toxic, non-combustible coating with an extraordinary capability: it releases water in the heat of fire. The panels exceed "model" building code requirements in every targeted fire test and application, and are unique in combining properties that increase panel strength and minimize environmental and human impact. Blazeguard® provides Barrier's customers a premium material choice meeting an increasingly challenging combination of requirements in residential and commercial building construction. Blazeguard® customers include many of the top multifamily homebuilders, and commercial modular building manufacturers in the United States.
