

Quarterly (Q2 Fiscal 2008) and monthly (December 2007) Sales Revenue and Sales Volumes

January 11, 2008 - International Barrier Technology Inc. ("Barrier") (IBTGF: OTCBB; IBH: TSXV), a manufacturer of proprietary fire-resistant building materials has released revenue and sales volumes results for the quarter (Q2 Fiscal 08) and the month ending December 31 2007. Total revenue generated for the quarter was \$1,065,113 vs. \$1,639,999 during the same period in 2006. Revenue attributable to the Commercial Modular industry grew 44% to \$419,289 (vs. \$291,201 in Q2 07). Revenue into the Residential Roof Deck Market was considerably lower this year as sales remain impacted by the current housing market - \$129,004 vs. \$557,857 in 2006. Revenue for the month of December 2007 was 239,916 in comparison to \$450,323 in December 2006.

Sales volume of shipments of Blazeguard product for the quarter ending December 31, 2007 was 1,555,200 sq ft. This compares to the 2,251,800 sq ft that was shipped during the same period one year ago. Commercial Modular shipments increased 37% (1,263.8 vs. 924.4) year over year. Residential Roof Deck sales were 263,900 sq ft vs. 1,325,800 sq ft in Q2 Fiscal 06 (of which 884,000 sq ft was directly into Florida). Shipments into the Structurally Insulated Panel Market increased (27,500 sq ft vs. 1,600 sq ft).

In the month of December, Barrier shipped 359,904 sq ft of Blazeguard products, in comparison to last year's monthly total of 632,736 sq. ft. Shipments into the Commercial Modular Sector were 262,272 sq ft. Blazeguard sales into the Residential Roof Deck Market were 89,952 sq ft and we shipped 7,680 sq ft into the Structurally Insulated Panel industry. This is in comparison to 334, 848 sq ft, 296,288 sq ft and 1,600 sq ft into respective markets in December 2006.

We are beginning to see some movement in the Florida market, which appears to be slowly starting to build in the multi-family residential arena again. A rail car load of material was shipped there during December and two additional rail cars will follow in mid-January. We are cautiously optimistic that the building levels there will gradually start growing again.

About International Barrier Technology Inc.

International Barrier Technology Inc. (OTCBB: IBTGF; TSXV: IBH) develops, manufactures, and markets proprietary fire-resistant building materials branded as Blazeguard®. Barrier's award-winning Blazeguard® wood panels use a patented, non-toxic, non-combustible coating with an extraordinary capability: it releases water in the heat of fire. The panels exceed "model" building code requirements in every targeted fire test and application, and are unique in combining properties that increase panel strength and minimize environmental and human impact. Blazeguard® provides Barrier's customers a premium material choice meeting an increasingly challenging combination of requirements in residential and commercial building construction. Blazeguard® customers include many of the top multifamily homebuilders, and commercial modular building manufacturers in the United States.
